## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: the specification is replete with spelling errors. For example please refer to the last paragraph of page 3, "glow" should be "grow".

Applicant is required to review the entire specification and provide appropriate correction.

### ***Claim Rejections - 35 USC § 112***

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 6, dependent on claim 1, does not appear to further limit the structure of claim 1. Claim 6 appears to claim the combination of the claimed apparatus with another apparatus and a workpiece. The scope of the claim cannot be determined.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 3723

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 51-12157. '157 discloses the claimed invention except for the shape of the vibrators being polygonal or of a quadrangle cross-section. It is noted that the shape of the vibrators is not critical to the invention, in that as long as the second vibrator fits within the first vibrator, the shape of the vibrators is not critical. Applicant has not claimed that the second vibrator is fitted within the first vibrator in these claims.

Therefore, as the shape of the vibrators is not critical to the functioning of the invention as claimed, one of ordinary skill in the art would have found it a matter of design choice to make the vibrators of '157 of any shape desired or expedient. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47.

***Allowable Subject Matter***

6. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3723

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar abrading devices are cited of interest.
